WELCOME TO THE CYBER COMPETITION FOR NEW COMPETITORS

COMPETE & LEARN

NCAE Cyber Games is a competition for cybersecurity students who have never participated in a competition or hackathon before. Competitions are a great way to learn new skills, explore career options, and build up your resume, but they can be intimidating if you've never tried one before. This program aims to make it easy (and fun) for you to see how competitions work and learn with first-timers. Interested students can register now, and we will connect you with your school's NCAE Cyber Games faculty liaison. Once registered, you can start exploring the Sandbox right away to get a feel for what kinds of challenges make up a cyber competition.

WHY SHOULD YOU JOIN?

Cyber competitions add serious value to your resume, demonstrating to potential employers that you have the skills and hands-on experience of defending a network and that you can work as part of team. Competitions can also help you find your place in the field by giving you the opportunity to test out different cyber work roles. Are you an encryption expert? An incident responder? An investigator? See how each role functions and which fits you best!

WHAT DO YOU NEED TO KNOW?

NCAE Cyber Games is open to any undergraduate student enrolled at an NCAE-C-designated institution. The competition is designed to help new competitors learn about hackathons and CTF competitions in an environment focused on teamwork and growing your skills. To compete, you only need a few things: a hunger for knowledge, a positive mindset, and the desire to solve problems!

- **Where do I start?** Visit ncaecybergames.org and click "register." We'll let your school know that you've signed up and alert your faculty advisor.
- **What skills do I need?** The program is designed for students enrolled in cybersecurity or related computer science programs, but no particular skillset is needed to start.
- **What if I don't have a team or a faculty advisor?** Register anyway! We will alert your school's NCAE representative of your interest in participating.

REGISTER TODAY AT NCAEcybergames.org THIS IS YOUR COMPETITION
